Summary

Senior product designer with 10+ years across B2B and B2C — mobile, web and enterprise. Shipped inside major corporations (Transneft, Sber, EPAM) and fast-moving fintech and crypto startups; products I worked on have reached up to 1.5M MAU.

I work at the intersection of design and code: I build and scale design systems, prototype in React and TypeScript, and use AI-assisted workflows to compress the path from idea to production. Instead of handing off mockups, I deliver solutions ready for implementation.

Core skills

Design — Product design, design systems, design tokens, UX research, usability testing, user flows, CJM, wireframing, prototyping, accessibility, mobile app design (iOS / Android), responsive web design

Engineering — React, TypeScript, JavaScript, HTML5, CSS3, Git, design-to-code, responsive markup

AI-assisted workflow — Claude Code, Cursor, Codex, Figma MCP (programmatic access to tokens and components), prompt engineering

Tools — Figma, Storybook, Jira, Confluence

Experience

Senior Product Designer — Transneft-Technologies

Aug 2023 — Present · Moscow, Russia · Hybrid

- Lead design for three internal digital products (mobile + web, ~15K MAU), from research through release
- Scaled the design system to 50+ components: tokens, variables, theming, UI standardisation

- Cut dev-side design revisions by 25–30% through systematic design review and UI standardisation
- Introduced AI tools into the design process (Claude, Cursor, Codex), accelerating prototyping, UI generation and design-to-dev handoff
- Build interactive prototypes in code (React / JS) and take part in frontend review

Key Designer — SberTroika

Feb 2023 — Aug 2023 · Moscow, Russia

- Designed and shipped new features for the Moya Troika app (iOS / Android, 1–1.5M MAU)
- Owned critical user scenarios: fare payment, balance top-up, trip management
- Improved UX of the mobile app and the web passenger cabinet (~300–400K DAU)
- Contributed to the growth of the product design system; worked closely with PO and engineering on prioritisation and delivery

Senior UX Designer — EPAM Systems

Mar 2021 — Feb 2023 · Moscow, Russia · Remote

- Internal enterprise products with a distributed audience of ~50K users
- Ran UX research, built customer journey maps, shaped user stories
- Contributed to the corporate UUI4 design system: tokens, variables, theming
- Worked with international engineering teams; English as the working language

Product Designer — OTC Marsbase

Jan 2021 — Aug 2021 · Remote

- OTC crypto trading platform, ~80–120K MAU
- Designed core scenarios: OTC deals, order management, wallets, transactions
- Shaped product logic at an early startup stage together with the founders
- Designed interfaces under security and financial constraints; carried the product from concept to production

Product Designer — Nominex

Nov 2019 — Jan 2021 · Remote

- Crypto exchange and DEX products, ~150–250K MAU
- Designed complex scenarios: trading, liquidity pools, farming, asset management

- Shaped UX strategy and interface architecture; built the UI kit and contributed to the product design system

Web Designer — Geex Arts

May 2019 — Jan 2020 · Moscow, Russia

- Product sites and web services for international clients
- Contributed to the Spott.ai redesign and the design of mav.farm — Awwwards and FWA Site of the Day

Product Designer — Oleg Chulakov Studio

Apr 2017 — Apr 2019 · Rostov-on-Don, Russia

- Adapted web interfaces for mobile; worked with the studio design system and supported engineering
- Tested hypotheses and improved user scenarios across client products

Education & certifications

Yandex Practicum — Professional Retraining Diploma, Frontend Development · Oct 2025 — Sep 2026 Qualification: Programmer · 628 hours · HTML/CSS, JavaScript, TypeScript & OOP, React, routing & auth, React testing

MGIMO University, Moscow — LL.M., International Business, Trade and Tax Law · 2011 — 2013

Google UX Design Certificate — Coursera, 2023

EF SET English Certificate — 68/100, C1 Advanced, 2022

Selected projects

Personal portfolio — designed and coded by me (React, GSAP) · ivan-pavlov-portfolio.vercel.app

E-commerce storefront — catalog, filtering, image optimisation (Next.js) · irenafindings.ru

Design system work — component libraries with tokens, variables and theming at Transneft-Technologies (50+ components) and EPAM UII4

Languages

Russian — native · English — C1 Advanced
